

Professional Work Experience

UGRAD Research Assistant, Santa Clara University
06/2021 – 09/2021 | Santa Clara, CA, USA

- Will use mixed-method approach in Dr. David Jeong's lab  to study social media interactions as well as ethical implications of emerging media technology.
- Researching topics: VR/XR, platform governance, tech ethics/law, big data analytics, and game studies.
- Maintaining and developing Discord server  and professional webpage for research team.

VMVault Global Sales Portal Builder, VMware
08/2017 – 05/2019 | Palo Alto, CA, USA

- Developed portal  reviewing key initiatives, vision/scope, and awards of Global Sales organizations.
- Applied HTML/CSS knowledge while understanding VMware's VMVault  user interface within 4 months.
- Shadowed company leads to learn about careers and quickly acclimated to an ad-hoc task experience.

Long-Term Projects

Santa Clara University Discord Network,
Administrator, Moderator, and Developer 

- Created and maintained a Discord  community-based forum that served over 1/10th of my school's student body, promoting vital social exchange and growth, especially during the COVID-19 pandemic.
- Currently in consideration for Discord's Partner Program 
- Pair-programmed with Node.js module Discord.js  to develop bot user that leverages Discord's API :
 - User Verification System: Bot verifies new users within the school's online (.scu.edu) domain.
 - ModMail ticketing system: Bot allows server members to seek instant support from moderators.
 - COVID Dashboard Scraper: Bot extracts SCU testing data  and visualizes the results with Chart.js .
 - Utilized interactive exception handling  with messages.

Bay Area Lightning Complex Fires Webpage,
Open Source Contributor and Developer 

- Lightweight website that monitors the outbreak of the Bay Area Lightning Complex Fires with toggling dark/light mode features and minimalist, "less-is-more" appeal.
- Webpage exceeds benchmarks for avg. session duration (2:12 min.) and number of sessions per user (2.63); 176 new users, 461 sessions, 757 page views over 9 months.

freeCodeCamp Fullstack Dev Exercises 

- Delving into responsive web design, data structures, fullstack, data visualization, and APIS/microservices.
