

## Professional Work Experience

**UGRAD Research Assistant, Santa Clara University**  
06/2021 – 09/2021 | Santa Clara, CA, USA

- Will use mixed-method approach in Dr. David Jeong's lab  to study social media interactions as well as ethical implications of emerging media technology.
- Researching topics: VR/XR, platform governance, tech ethics/law, big data analytics, and game studies.
- Maintaining and developing Discord server  and professional webpage for research team.

**VMVault Global Sales Portal Builder, VMware**  
08/2017 – 05/2019 | Palo Alto, CA, USA

- Developed portal  reviewing key initiatives, vision/scope, and awards of Global Sales organizations.
- Applied HTML/CSS knowledge while understanding VMware's VMVault  user interface within 4 months.
- Shadowed company leads to learn about careers and quickly acclimated to an ad-hoc task experience.

## Long-Term Projects

**Santa Clara University Discord Network,**  
Administrator, Moderator, and Developer 

- Created and maintained a Discord  community-based forum that served over 1/10th of my school's student body, promoting vital social exchange and growth, especially during the COVID-19 pandemic.
- Currently in consideration for Discord's Partner Program 
- Pair-programmed with Node.js module Discord.js  to develop bot user that leverages Discord's API :
  - User Verification System: Bot verifies new users within the school's online (.scu.edu) domain.
  - ModMail ticketing system: Bot allows server members to seek instant support from moderators.
  - COVID Dashboard Scraper: Bot extracts SCU testing data  and visualizes the results with Chart.js .
  - Utilized interactive exception handling  with messages.

**Bay Area Lightning Complex Fires Webpage,**  
Open Source Contributor and Developer 

- Lightweight website that monitors the outbreak of the Bay Area Lightning Complex Fires with toggling dark/light mode features and minimalist, "less-is-more" appeal.
- Webpage exceeds benchmarks for avg. session duration (2:12 min.) and number of sessions per user (2.63); 176 new users, 461 sessions, 757 page views over 9 months.

**freeCodeCamp Fullstack Dev Exercises** 

- Delving into responsive web design, data structures, fullstack, data visualization, and APIS/microservices.

## Biography

Obsessed with tech and the intuitive user-computer design process, I'm a resourceful individual who's passionate about the computing industry in the Silicon Valley.

## Education

Santa Clara University, Santa Clara, CA  
**B.S., Web Design & Engineering; Minors:**  
**Computer Engineering and Sociology**

- 3.264 Cumulative GPA / 4.0 Major GPA

## Relevant Coursework

- Digital Logic Design (Fall 2020)
- Data Structures & Types (Winter 2021)
- ENGR Calculus (Freshman / Sophomore)
- Tech & Communication (Spring 2021) 
- Tech & Culture (Spring 2021)
- Web Technologies (Fall 2021)
- Basic Digital Imaging (Fall 2021)
- Community ENGR Design (Fall 2021)

## Awards / References

**freeCodeCamp Certification** 

- Responsive Web Design 

**DataCamp Certification** 

- Intro to Python 

**LinkedIn Certifications** 

- HTML, CSS, JS, Node.js, Java, Python, C, Git, Github, Microsoft PowerPoint

**Arctic Code Vault Contributor** 

- Contributed some of my active public repos to be preserved in Github's Arctic World Archive for future generations.

## **Career Testimonials**

- Reference 1  from Juniper Networks
- Reference 2  from VMware, Inc.
- Reference 3  from VMware, Inc.

**Typing Speed: 106 WPM / 97%**
