Long-Term Projects

Santa Clara University Discord Network, Administrator, Moderator, and Developer 🛮

- forum that served over 1/10th of my school's student body, promoting vital social exchange and growth, especially during the COVID-19 pandemic.
- Currently in consideration for Discord's Partner Program 🛮
- Pair-programmed with Node.js module Discord.js 🛽 to develop bot user that leverages Discord's API 2:
 - User Verification System: Bot verifies new users within the school's online (.scu.edu) domain.
 - ModMail ticketing system: Bot allows server members to seek instant support from moderators.
 - COVID Dashboard Scraper: Bot extracts SCU testing data 🛮 and visualizes the results with Chart.js 🗗.
 - Utilized interactive exception handling \(\text{with messages.} \)

Bay Area Lightning Complex Fires Webpage, Open Source Contributor

- Lightweight website that monitors the outbreak of the Bay Area Lightning Complex Fires with toggling dark/light mode features and minimalist, "less-is-more" appeal.
- Webpage exceeds benchmarks for avg. session duration (2:12 min.) and number of sessions per user (2.63); 176 new users, 461 sessions, 757 page views over 9 months.

freeCodeCamp Fullstack Dev Exercises

• Delving into responsive web design, data structures, fullstack, data visualization, and APIS/microservices.

- Computer Languages Mentioned in Awards
